Base map information shown on this FIRM was derived from digital orthophotography collected by the Iowa Geological and Water Survey, Department of Natural Resources. This imagery was flown in 2009.

The map reflects more detailed and up-to-date stream channel configurations than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and FDTs may reflect stream channel distances that differ from what is shown on the map.
